

## FLX Product SKU descriptions

The **two omni microphone** version is ideal for a medium sized conference room where it is important to capture every word of every participant in the call.

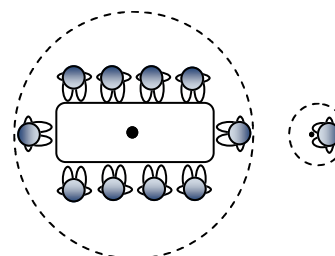

The two omni version also works perfectly in an environment where two distinct areas of the room need to be covered, as for example an executive office.

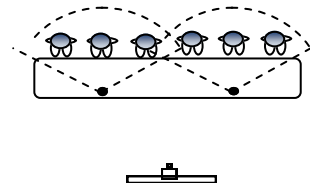

**10-FLX2-200-POTS: \$1185**

The **one wearable and one omni** version of the FLX is the solution for a conference room in which often presentations are given. The wearable ensures that the presenter is heard on the far side, while the omni covers the audience in the room.

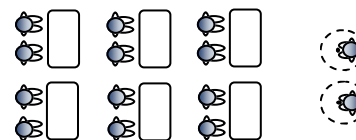

**10-FLX2-101-POTS: \$1185**

The **two directional microphone** version is ideal for a conference room where participants in a video or audio call will mostly be on in a limited area, e.g. on one side of the conference room.

**10-FLX2-020-POTS: \$1185**

The **two wearable microphone** version is ideal for presentation settings where it is important that presenters are heard, but no coverage is required for life audience in the room.

**10-FLX2-002-POTS: \$1185**

All the FLX come with:

- Superior Audio Quality
- Wireless Freedom for Optimal Sound
- Revolabs RF Armor(TM) Technology - No more cell phone buzz or interference
