2N Helios IP Manager license for 2 - 5 units

The 2N Helios IP Manager for 2 - 5 units is a new tool for the remote management of several 2N Helios IP Vario door intercoms connected over the IP network. With its attractive and easy-to-use interface you will not need to worry about 2N Helios IP Vario configuration. From now on, it will be simpler and faster. Forget about having to configure each of your 2N Helios IP Vario door intercom units separately and centralise your system. As the system works on the basis of a shared database, with this powerful tool you will be able to do such things as see the status of the units, configure them, and carry out all user management - set permissions for each user, for each 2N Helios IP Vario, e.g., the company's CEO can have access to all departments, but the sales department employees can only access their sections. It also makes it easier to add or erase a user, and manage users' access cards and other functions.

Benefits:

- A simple solution for a more comfortable configuration and management
- Centralised solution
- Zone access control

Target groups:

- Office buildings
- Residential areas, apartment buildings
- Campuses, universities
- Hospitals, laboratories
- Transport
- Security
