

# 2N Helios Standard electrical lock for door entry system (932070)

Product Name: 2N Helios Standard electrical lock for door entry system (932070)

Manufacturer: 2N Telecommunications

Model Number: 932070

2N Helios Standard electrical lock for door entry system - 932070

The 2N Helios Standard electrical lock (932070) is an electric lock for use with the 2N Helios Vario Door Entry Systems.

The 2N Helios Standard electrical lock (932070) can be controlled from a remote location via a LAN, WAN or web connection.

This allows a visitor to communicate with a specific resident or (for example) with a remote security office, who can trigger the locking mechanism via an IP device connected to the same network, such as an IP telephone.

- Standard electrically-triggered door lock
- Compatible with the 2N Helios range of Door Entry systems
- High quality, secure lock mechanism

**Price: £36.90**
