Product Name: 2N Lift8 Fireman Unit
Manufacturer: 2N Telecommunications
Model Number: lift8-fireman

2N Lift8 Fireman Unit
The 2N Lift8 Fireman Audio Unit enables communication between a fire lift cabin and the fire department staging area in accordance with Czech standard EN81-72.
The 2N Lift8 Fireman Unit is activated by turning the switch to position 1 and pressing the TALK button, enabling you to communicate with the lift cabin. It is supported by firmware for 2N Lift8 version 1.6.0 and higher.
