Product Name: AVM FritzBox Fon ATA

Manufacturer: -

Model Number: -

Availability: Please note this product has now been discontinued.

FRITZ!Box Fon ata makes IP Telephony as easy as you'd like it to be: connect your existing telephones; pick up the receiver -- that's all! Now you can talk over the Internet with Voice over IP (and you don't need to turn on your PC), or over the conventional phone line. Simply connect FRITZ!Box Fon ata to your existing router or ADSL modem. FRITZ!Box Fon ata connects your PCs to the Internet through an Ethernet or USB port - with integrated firewall protection.

The Fritz!Box Fon ata includes a full-featured router, 2 phone ports for VoIP and a fully functional PSTN port (analogue/ISDN).

FRITZ!Box Fon ata at a Glance:

• FRITZ!Box Fon ata combines a Broadband Router and a PBX
• Economical phone calls over the Internet with VoIP, or over the ISDN or analog phone line
• Internet telephony with existing phones, without turning on the PC
• Connect analog phones, answering machines, and fax machines
• Intelligent bandwidth management for perfect voice quality
• PC-lines over Ethernet or USB
• Integrated, TÜV-tested firewall protects connected PCs

FRITZ!Box Fon ata Connections:

• Two extensions for analog phones, faxes and answering machines
• Conventional phone line, either ISDN or POTS
• USB port for PC or notebook (Windows, Linux, or Mac)
• Ethernet port (10/100 Mbit/s) for computers, game consoles (such as Xbox or PlayStation), or a LAN hub or switch to connect additional PCs

FRITZ!Box Fon ata Operation:

• Easy router configuration through standard browsers
• Extensions configurable individually
• Call routing for customized use of Internet and landline telephony
• Extensions of an existing PBX can also use Internet telephony
• Speed dialing, dial-out blacklist, call-through function, caller list
• Convenient on-line meter to monitor the ADSL budget
• Switch to Expert Mode to configure custom application scenarios

FRITZ!Box Fon ata Details:

• PBX for Internet and landline telephony (ISDN and POTS lines)
• Internet telephony in conformance with SIP (RFC 3261)
• Intelligent codec management
• ADSL router with DHCP server and IP masquerading/Network Address Translation
• Firewall with stateful packet inspection and secure port forwarding for local servers
• Bandwidth management: ADSL traffic shaping for optimum use of the ADSL line
• Dimensions: 160 × 122 × 31 mm; tabletop or wall-mounted installation
