The Fritz!Box Fon WLAN makes IP Telephony as simple as it should be. You won't need to turn your computer on to make and receive calls, and you have the freedom that a wireless network brings. You can access the internet through the Fritz!Box via Ethernet, USB or wireless signals. The Fritz!Box Fon WLAN includes an integrated ADSL modem, a full-featured router, 2 phone ports for VoIP and a fully functional PSTN port (analogue/ISDN).

Integrated within the Fritz!Box WLAN is a powerful firewall and an elegant VoIP system with a simple interface. Simply place the WLAN away from large metal or signal-emitting devices and with minimal configuration you are on your way.
