## Aastra 622D DECT IP Phone

The comfortable Aastra 622D has a large illuminated 2" graphic colour display and 8 programmable keys provide you with quick access to your favorite functions. The handset is equipped with a Bluetooth® interface for cordless headsets and comes with an option for a higher capacity battery. Furthermore the GAP standard is supported.

### Aastra 622D DECT IP Phone Key Features

- Colour TFT display (2", 176 x 220 dots, 65,536 colours)
- Telephone book with 200 contacts, with 8 possible entries each: office-, private- and mobile number; email address, fax, quick dial, ringing tone and name assignment
- VIP phonebook with 6 entries
- Ambient noise filter for loud environments
- 44 polyphone ring tones (Midi type), 29 normal ring tones and 7 alarm tones with automatic volume control can be assigned
- Up to 5 user profiles for e.g. headset use or meeting usage can be configured
- Hands free operation

Service facilities like firmware download over air help reducing support costs. The optionally applicable microSD-Card saves the subscription data and the most important local device data as well as your private phone book. This guarantees that if a handset is defective the key data can be quickly transferred to a replacement handset just by moving the card. The new handset can be used immediately without having to subscribe again.
