Availability: In Stock
Aastra 6773ip Proprietary IP System Phone

Ease of operation paired with versatile system functions, custom solutions for all your terminal requirements and the use of innovative technology are what characterise the OpenPhone 7x range of telephones. Ergonomics and context-sensitive user guidance are other special aspects of their design. In addition, all the terminals are also suitable for wall-mounting.
All terminals are also equipped with a hands-free function and a DHSG headset connector. Power can supplied over Ethernet. The integrated switch allows a PC to be connected directly to the OpenPhone, thus reducing the amount of infrastructure required.
OpenPhone 73 IP The OpenPhone 73 IP has a four-line dislay which provides an even better overview as well. Three softkeys and five function keys help you get to grips with even the most difficult communications tasks. This terminal can be expanded by adding up to three 73P keypad extensions.
Key Extensions
This keypad add-on makes an additional 36 softkeys (function and destination keys) available. It is compatible with the OpenPhone 73 IP and OpenPhone 75 IP. Up to three KeyExtensions with 36 keys each can be connected.
Advice for OpenCom 1000: up to 10 call keys programmable per KeyExtension 73P
With the Aastra 800, an innovative hardware-independent call manager from Aastra, it's quick and easy to set up a powerful and professional communication system – without manufacturer-specific hardware or complex programming.
