

AudioCodes 310HD IP Phone

Product Name: AudioCodes 310HD IP Phone

Manufacturer: AudioCodes

Model Number: IP310HDE

AudioCodes 310HD IP Phone

The AudioCodes 310HD IP Phone offers a new dimension of voice call quality and clarity for the IP Telephony market. This IP Phone further expands AudioCodes's VoIP product offering for the Enterprise and Service Providers markets.

- 1 line
- 2 concurrent calls
- 2X16 character backlit LCD display

The 310HD IP Phones can be combined with AudioCodes mobility solutions to enable a continuous access of end-users to high quality VoIP calling, wherever they are.

Cutting Edge Voice Quality & HD VoIP Based on AudioCodes's advanced, robust and field-proven VoIPerfectHD™ software, AudioCodes's IP Phones are designed to utilize the most popular wideband coders such as G.722, G.722.2 (WB-AMR) and Microsoft Real Time Audio (RTA). Each of these phones features enhanced proprietary capabilities, such as packet loss concealment, high quality wideband acoustic echo canceler, and low-delay adaptive jitter buffers to enrich the HDVoIP experience.
