Product Name: AudioCodes One Box 365 Standard Edition
Manufacturer: AudioCodes
Model Number: ONEBOX-STANDARD

AudioCodes One Box 365 Standard Edition
The AudioCodes One Box 365 Standard Edition is a complete Lync enterprise voice solution for Office 365 customers, part of AudioCodes’ One Voice for Lync suite of products and services that simplify and accelerate Lync enterprise voice deployments.
AudioCodes One Box 365 Standard Edition Key Features

• Supports up to 200 users
• Integrated hardware appliance, based on Mediant 800B
• Lync server roles and Session Border Controllers (SBC) all in one box
• Full gateway capabilities with a variety of TDM connectivity options
• Intuitive GUI for self-management
• Fully licensed SQL Server and Windows Server included
• Simplified migration with dedicated Active Directory and Office 365 connectors
• Full Lync UC Enterprise Voice

AudioCodes One Box 365 Standard Edition is a fully integrated appliance based on the field-proven and Lync-certified Mediant 800 Gateway/SBC hardware platform and is suitable for deployment at SMB and remote branch sites serving up to 200 users. The Mediant 800 platform hosts a fully-featured instance of the Lync Server 2013 software solution along with a dedicated, GUI-based management system. With its simplified architecture and dedicated management software, AudioCodes One Box 365 enables accelerated deployments of Lync Enterprise Voice within Office 365 environments. This leads to complete Lync services being up and running in a matter of a few hours.
