

plugged into Skype

Product Name: Aver VCBridge

Manufacturer: AVer

Model Number: VCBridge

Aver VCBridge

With the Aver VCBridge, AVer HVC series users have the unique ability to seamlessly integrate Skype® video calls with traditional H.323 video conference. Aver VCBridge Features

- bring 1 Skype® user into an H.323 multipoint video conference at any time
- Skype® users can send and receive live video / audio / shared content during any H.323 video conference
- take advantage of the unparalleled mobility of Skype® to video conference using a notebook, tablet, smartphone or any Skype®-friendly device
- no licensing fees, professional server or additional IP address required
- unmatched 3-year warranty
- Plugged into Skype®; certified

VCBridge represents a unique breakthrough for the Video Conferencing industry by bringing any Skype® user directly into an H.323 call, allowing the user to send and to receive live video, audio and shared content. VCBridge gives clients and suppliers who lack an H.323 system as well as coworkers and executives working remotely the chance to join in video conferences via a laptop, tablet, smartphone or any other Skype®-friendly device. Enjoy the stability and functionality of a traditional VC system with the mobility and flexibility of Skype®.
