

Cisco SPA232D Multi-Line DECT ATA

Product Name: Cisco SPA232D Multi-Line DECT ATA

Manufacturer: -

Model Number: SPA232D

Cisco SPA232D Multi-Line DECT ATA

The Cisco SPA232D allows you to use an analog device, such as a phone or fax machine, with VoIP services over the internet. The SPA232D features one FXS port for an analog device, one FXO port to connect to the PSTN if you wish, and a built in DECT base station which is able to support up to 5 Cisco SPA302D wireless handsets.

Cisco SPA232D Key Features

- Quality voice and carrier-grade feature support
- Large scale deployment and management for service providers
- Outstanding security
- Comprehensive feature set
- Enhanced mobility
- Easy installation and changes

The Cisco SPA232D will support 11 SIP accounts - 2 per SPA302D phone and 1 for your analog device. When using the SPA232D with the SPA302D wireless handsets, you can enjoy up to 4 concurrent calls between all handsets.
