Product Name: Dialogic Diva Server V-4PRI-120
Manufacturer: -
Model Number: -

Availability: In Stock   The Dialogic Networks Diva Server V-4PRI board is an exceptionally powerful PC-based telephony adapter that provides rich media processing capabilities for up to 120 voice channels over E1 interfaces or up to 96 voice channels over T1 interfaces. It is the perfect choice for enterprises and service providers looking for a large size voice, speech and conferencing platform that can easily be expanded to multiple adapters per system. Extremely Powerful Digital Signal Processors (DSP) – one dedicated to six communication channels, ensures real-time voice processing reducing latency and improving overall system performance. Thus the Diva Server V-4PRI enables both legacy and IP-based computer telephony (CTI) solutions, as well as leading edge voice business applications, such as; voice portals and speech-enabled contact centers.

• Up to 120 voice channels using four E1 or four ISDN PRI interfaces
• Up to 96 voice channels using four T1 interfaces
• World-class media processing – voice activity detection, DTMF and tone handling, echo cancellation
• Efficient integration with speech (ASR and TTS) engines
• Enhanced Switching and Conferencing support
• Robust Voice over IP (VoIP) technology built in
• Powerful onboard RISC CPU and 20 DSPs ensure high performance, offloading server processing
• Extensive, open and well documented API
• Tightly integrated with most recent Microsoft Windows 2000, XP and Server 2003
• Full Linux support - including the latest SuSE, RedHat and Debian versions, as well as via source level RPM and DEB
• Ease of installation guaranteed by Plug and Play conformance
• Easy upgrade with free software downloads from Eicon
• 5 year warranty, subject to product registration
