Digium AEX401E - 1 FXO PCI Express Card with Hardware Echo Cancellation (1AEX401EF)

Product Name: Digium AEX401E - 1 FXO PCI Express Card with Hardware Echo Cancellation (1AEX401EF)

Manufacturer: -

Model Number: 1AEX401EF

Please Note: The Digium AEX410P has been discontinued. For an alternative, we highly recommend the Digium A4 Series.

Digium AEX401E - 1 FXO PCI Express Card with Hardware Echo Cancellation (1AEX401EF)

The Digium AEX401E is an AEX410 PCI Express Card with 1 FXO module and Hardware echo cancellation module.

Used in conjunction with Asterisk and standard PC hardware, one can create a telephony system that includes all of the cutting edge features of a high-quality business PBX.

Features

- 4 Ports for connecting analog telephones or POTS lines
- Half-length Analog Card
- Up to 4 FXS or FXO Modules
- High Performance Echo Cancellation (HPEC) Software

Using an industry-standard bursting, bus-mastering interface chip that is found within millions of PC systems worldwide, and Digium VoiceBus technology, the card eliminates the requirement for external gateways, with industry-leading performance and price. The trunk and station modules are interchangeable, allowing the creation of any combination of interfaces.

The optional hardware echo cancellation module provides 1024 taps (128 milliseconds) of echo cancellation for superior voice quality on both trunk and station interfaces. Scaling of this solution is accomplished by adding additional Digium AEX401E or other Digium analog interface cards. The Digium AEX401E card provides the same functional capacity as the AEX410, but improves significantly upon its system compatibility and provides the capability of connecting to Digium's hardware-based echo cancellation modules.
