Digium AEX431B - 3 FXS 1 FXO PCI Express Card (1AEX431BF)

Product Name: Digium AEX431B - 3 FXS 1 FXO PCI Express Card (1AEX431BF)
Manufacturer: -
Model Number: 1AEX431BF

Please Note: The Digium AEX410P has been discontinued. For an alternative, we highly recommend the Digium A4 Series.

Digium AEX431B - 3 FXS 1 FXO PCI Express Card (1AEX431BF)
The Digium AEX431B is a AEX410 PCI Express Card with 3 FXS 1 FXO modules and no echo cancellation module.
Used in conjunction with Asterisk and standard PC hardware, one can   create a telephony system that includes all of the cutting edge features   of a high-quality business PBX.
Features

• 4 Ports for connecting analog telephones or POTS lines
• Half-length Analog Card
• Up to 4 FXS or FXO Modules
• High Performance Echo Cancellation (HPEC) Software (Optional)

Using an industry-standard bursting, bus-mastering interface chip   that is found within millions of PC systems worldwide, and Digium   VoiceBus technology, the card eliminates the requirement for external   gateways, with industry-leading performance and price. The trunk and   station modules are interchangeable, allowing the creation of any   combination of interfaces.
The optional hardware echo cancellation module provides 1024 taps   (128 milliseconds) of echo cancellation for superior voice quality on   both trunk and station interfaces. Scaling of this solution is   accomplished by adding additional Digium AEX431B or other Digium analog interface cards.
The Digium AEX431B card provides the same functional capacity as the   AEX410, but improves significantly upon its system compatibility and   provides the capability of connecting to Digium's hardware-based echo   cancellation modules.
