Product Name: Digium TE134 Single Span PRI Card
Manufacturer: Digium
Model Number: 1TE134F

Digium TE134 Single Span PRI Card
The Digium TE134 has the ability to create a seamless network, interconnecting traditional telephony systems with Voice over IP technologies. The TE134 card supports industry standard telephony protocols, including Primary Rate ISDN (both North American and Euro Standard) protocol families for voice.
Digium TE134 Single Span PRI Card Key Features

• One (1) RJ48 Interface Port
• Selectable T1, E1 or J1 Mode / Half-Length, Half-Height, Digital Card
• PCI-Express (1TE133F)
• PCI (1TE134F)
• Up to 24 (T1/J1) or 30 (E1) simultaneous calls
• Built-in 128ms Octasic DSP hardware echo cancellation

Both line-side and trunk-side interfaces are supported, as well as advanced call features. Octasic based hardware echo cancellation is built into the card, which removes the task of echo cancellation from the systems CPU and increases overall system performance and call quality. With the combination of Digium hardware and Asterisk software, numerous telephony configurations are possible.
