

Epygi Quadro 4xia

Product Name: Epygi Quadro 4xia

Manufacturer: -

Model Number: -

Please note that this product has been discontinued. For an alternative we recommend the Epygi IP PBX selection

The Quadro4xia is the fully featured IP PBX for small businesses that prefer ISDN to connect to the PSTN and ADSL for Internet connectivity. With one ISDN line and one ADSL port Quadro4xia can enable up to 70 physical and virtual extensions to make up to 20 calls in parallel. Besides four FXS phones, up to 16 fully featured SIP phones may also be attached to Quadro4xia's LAN port. In addition, all SIP extensions assigned to a line may be mirrored and act as remote IP extensions. Wherever you are, calls will reach you, and you will be able to make calls as if you were in your office. **Feature Rich IP PBX** The Quadro4xia offers the same multitude of features as all Quadro IP PBXs: extensive PBX functionality, integrated voicemail, cost saving call routing functionality, IP routing, SIP and H.323 call signaling and much more. **Integrated Internet Access Router** The Quadro4xia IP PBX embodies a fully-fledged Internet access router with firewall security, including IDS, NAT, policy and service based filtering as well as stateful inspection. An extensive IPSec VPN functionality with DES and 3DES encryption makes an additional contribution to data security. **VoIP Carriers** The Quadro4xia IP PBX is easily applicable for VoIP Carriers as well as small businesses. For VoIP carriers, a special wizard has been implemented.
