Manufacturer: Fanvil

Model Number: x3

Fanvil X3-003 (R) IP Phone

The Fanvil X3-001 (B) supports two lines and HD voice to provide higher satisfaction of communication. A desktop phone, unlike a personal mobile phone, often serves among several users in a family or office. Therefore, X3 brings in the concept of user profile which can store user's individual accounts and preference up to five users. User can easily restore and clean up his/her profile by simple signing in/out on X3. Fanvil X3-003 (R) IP Phone Key Features

- 2 Lines
- Up to 5 Users
- HD Voice
- Easy restore & clean up via signing / in out

Call logs and phonebook are the most important tool of a telephone that users rely on to quickly locate a contact or call history. X3 learned from the smart phone and enhanced the intelligence of call logs and phonebook. Fanvil is also planning to launch a cloud service to provide online phone software upgrade and a mobile app to synchronize user's phonebook from his/her mobile phone to X3.

While network condition is unpredictable, X3 has this feature called QoS indication which shows the transmission quality of a call on the screen to acknowledge users the communication reliability like a cellphone. There is more innovative design on X3 and it will definitely be the best desktop phone for users in the new era.
