FreePBX Phone Apps (25 Year License) - Sangoma FreePBX Add-On

Phone Apps are a suite of phone applications that integrate directly with FreePBX and the commercial End Point Manager. Phone Apps allow users to control functions and settings directly from the screen of their phone. The initial release of applications include Call Parking, Follow-Me Management and Do Not Disturb. This will be expanding to include additional functionality, features and supported devices in the near future. The goal is to empower users to intuitively manage call settings and features directly from their phone, minimizing the reliance upon hard to remember feature codes and logging into the PBX GUI to modify settings.
