Gigaset PRO Maxwell 10 Android Desktop VoIP Phone Base Unit

The Gigaset PRO Maxwell 10 Base Unit has a number of advanced features that empower you to take interactivity to the next level. This Gigaset Maxwell 10 phone uses Android 4.2, one of the latest versions of the worlds most popular mobile platform, and has a 10 inch touchscreen. That means a flexible, fully customisable user experience which allows you to work faster and more intuitively than ever.

Gigaset Maxwell 10 Key Features

- IP-based HD video phone with a 10 inch touch screen and Android OS
- Combine cloud-based company address books, e-mail accounts or CRM file
- Integrated front facing camera for video telephony in HD quality (720p)
- Supports VoIP/SIP and offers compatibility with many familiar telephone systems
- An additional camera can be connected via USB for conference calling
- Superb audio, three integrated loudspeakers and high-end HD audio quality

The Video. HD like life. The Gigaset Maxwell 10 delivers such life like video conferencing, you'll feel as though you're communicating face to face. The integrated camera provides brilliant pictures and high definition video, while the specially shaped body supports handsfree conversations.

The Sound. Attention-grabbing. Whether you're using speakerphone, corded handset or headset, we expect you'll be pleasantly surprised by the Gigaset Maxwell 10's sound quality. With its three built-in loudspeakers and integrated front microphone, the Maxwell delivers audio so clear that it makes interaction an experience.

The Apps. Flexibility you choose. The Gigaset Maxwell 10 connects you to a selection of more than 600,000 business apps to suit every professional taste. The choice is yours. Install the apps that support the way you do business, and make your Maxwell even smarter.

The Connectivity. Interfaces without limits. Gigaset designed the Maxwell 10 to be the centrepiece of your communication system. It's the most flexible Gigaset product, enabling you to connect to almost any device, with any technology, at any time. Welcome to a new era of business communication.
