Find out more

Advanced connectivityConnectivity via Bluetooth and mini-USB allows convenient data exchange between the handset and a PC as well as vCard exchange with mobile phones.
Great compatibilityThe SL610H PRO is perfect to use with the Gigaset N510 IP PRO, a DECT IP base station, or the Gigaset DX800A all-in-one hybrid desktop phone. It is also compatible with DE900IP PRO, a desktop phone, and all other Gigaset DECT base stations. Zero-touch installation ensures quick and easy configuration.
Phoning convenience The address book with up to 500 vCard entries saves all important business contacts for quick dialling. The automatic redial function, redialling of last 20 numbers entered and dialling out of the missed call list make phoning easy even when away from the desk. Outside office hours or during meetings the time-specific "do not disturb" function quiets external, non-VIP calls, but still allows important calls to come through.
Simple operation and easy customizationThe menu view can be customized via expert mode to include regularly used features. The simplified feature list makes it easy to find the functions truly used and needed every day. Nine programmable keys further add to convenience and efficiency.
Premium talk and standby times for optimum mobilityLong telephone calls become reality on the Gigaset SL610H PRO with a talk time of up to 15 hours. A standby time of up to 230 hours keeps this reliable cordless handset ready for use and offers true mobility in the office.
