

# Gigaset T300 SMB IP PBX

Product Name: Gigaset T300 SMB IP PBX

Manufacturer: Gigaset

Model Number: T300

Please Note: The Gigaset T300 has been discontinued. For an alternative, we highly recommend the Gigaset T440.

## Gigaset T300 PRO SMB IP PBX

The T300 PRO is the highly-efficient, flexible phone system ideal for small businesses. Users choose from fixed-line, ISDN, VoIP and mobile connectivity options and can opt for a converged network or easily use the PBX with an existing system. It also supports a complete professional feature set and seamlessly integrates into a Unified Communications environment. Easy to set up and administrate, the T300 PRO is the perfect small business communication solution made in Germany.

**Expandability**The T300 PRO connects businesses with multiple locations easily and quickly, thanks to its IP networking options. After two phone systems are connected via IP, the T300 PRO manages their certificate and information exchange.**Real time synchronization** When a new location or phone is added, the connected T300 PRO PBX synchronizes in real time. Presence management is built in: busy lights on the telephone or softphone inform of a colleague's location and status.**Optimal customer service**Location-based user groups with flexible overflow functions allow distributed switchboards, sales and marketing hotlines or support teams to become consolidated hotlines. No more busy signals or long queues – essential for top quality service.**Easy Setup and Administration**The built-in setup wizards enable zero-touch installation so that newly added phones work in minutes. The intuitive web-based interface, drag & drop functions, and support of standard protocols make configuration of the telephone system extremely easy.
