Product Name: Intelligent Recording IP TAP
Manufacturer: -
Model Number: ipTap

Availability: In stock
Intelligent Recording Desktop XtR ipTap
The Intelligent Recording IP TAP offers a simple plug-n-play solution for recording desktop IP Telephones. Simply connect to the IP Telephone line, connect to your desktop PC via USB and you have a powerful business recording tool right on your desktop.
Intelligent Recording IP TAP Features

• Plug n play, installed and configured to Record your SIP phone in seconds.
• Hi Impendence monitor only, does not interfere or transmit in any way.
• USB device with dedicated drivers that talk directly to the IP Phone Recorder application.
• Does not require secondary Ethernet or complex reference to IP addresses for installation.
• Small, easily concealed (only 4.25" x 3" x 1" in size).
• Low Cost
• Scalable, from 1 phone to many

Most IP Call Recorders rely on the use of Ethernet Cards within a PC to record IP Phones, this means they need serious configuration and in many cases (where a company has a separate IP Phone and data network), they require a second Ethernet card to tap into the IP telecom network. This ‘Double Ethernet’ configuration issue complicates things and causes many to look elsewhere. Look no further.

PC Phone Recording Software and Equipment

• XtR Desktop Phone Call Recording Software comes as standard with XtR ipTap and Telephone Conversation Recorders
