

Linksys SPA941 IP Phone

Product Name: Linksys SPA941 IP Phone

Manufacturer: -

Model Number: SPA-941-R

Availability: Discontinued

Please note that the Linksys SPA-941 has been discontinued. We recommend the Cisco SPA-303 as a good alternative.

This is a SIP based IP phone from Linksys/Sipura.

The SPA941 is suitable for use with SIP based IP PBX systems, or together with a SIP service provider.

The SPA941 phone is the First VoIP Telephone from Linksys since they bought Sipura. The SPA-941 is affordable, fully featured, stylish VoIP Phone with multiline appearances, graphical display, speakerphone, headset jack and message waiting indicator with a dedicated message retrieval button.

Key features

- Stand alone SIP Business Class Telephone
- Supports 2 SIP lines - upgradable Upto 4 Lines
- Cost Effective

Call Features With an intuitive, easy to operate user interface SPA-941 supports standard telephone features, including:

- Do not disturb
- Call transfer
- Three party conferencing
- Call hold
- Call History Missed Calls Dialed Calls Received Calls

- Address book
- Off-hook dialing
- Speed dialing

Stylish and functional in design, the SPA941 can be used in Small Office Home Office (SoHo), Enterprise, small to medium businesses (SMB) together with service offerings including IP PBX, hosted IP telephony and IP Centrex.

The SPA-941 is simple to use but as with all Sipura/Linksys products, there are a complete set of configuration options for the advanced user.
