

OpenVox A1200P0404 - 4 FXO 4 FXS

Product Name: OpenVox A1200P0404 - 4 FXO 4 FXS

Manufacturer: OpenVox

Model Number: A1200P0404

OpenVox A1200P0404 - 4 FXO 4 FXS

The A1200P0404 is an OpenVox A1200P bundled with 4 FXO modules and 4 FXS modules. You can also add FXO-100 or FXS-100 modules to use with this product according to your requirements.

The image above is A1200P with 12 FXO modules installed. A1200P0404 has 4 FXO100(red) modules and 4 FXS100(green) modules pre-installed.

The user can simply use A1200P with the provided Zaptel device driver (download on the left of the page) and Asterisk software, without the need to modify a single line of software code.

Via professional firmware design and a new device driver, the A1200P greatly decreases the CPU payload, and also increases the stability of whole system. The 12 port card uses less CPU cycle than the 4 port card.

The A1200P supports up to a total of 12 FXO and/or FXS connections with FXO-100 and/or FXS-100 modules.

The FXO-100 (FXO) module allows the A1200P card to terminate analog telephone lines (POTS). The FXS-100 (FXS) module allows the A1200P card to terminate analog telephones.

Key Features and benefits:

- Low CPU payload: below 25% CPU usage on server with 8 x A1200P fully loaded with 96 ports after driver installed, on a Celereon D 2.53Ghz.
- Scalable: Just add additional cards to extend the system.
- Modular design: Can upgrade at any time by adding extra FXO or FXS modules up to a total of 12 per card. (A1200P0404 comes with four FXO modules and four FXS modules.)
- Both 3.3v or 5v PCI slots can be used with this card.
- Module Pin to Pin compatible with X100M and S100M. You can use X100M/S100M modules on this card, or use FXO-100/ FXS-100 Modules from OpenVox.
- Excellent value: High quality at a low price
- Application ready: Use Asterisk to build your IP-PBX system.
- RoHS Compliant.
- Certificates: CE, FCC
- Five year warranty
