Product Name: OpenVox A400M01 - 1 FXO Mini-PCI Card
Manufacturer: OpenVox
Model Number: A400M01

OpenVox A400M01 - 1 FXO Mini-PCI Card

Please Note: This is a PCI Card. Please make sure your motherboard/server is compatible with this product.

The A400M01 is an OpenVox A400M bundled with 1 FXO module.
The Openvox A400M is a 4-port analog card with mini-PCI and works with PSTN line. It can be used to build a PBX system based on Asterisk open source platform. The above picture is an A400M22
You can also add FXO-100 or FXS-100 modules to use with this product according to your requirements.
The card supports up to a total of 4 FXO and/or FXS connections with FXO-100 and/or FXS-100 modules.
The FXO-100 (FXO) module allows the A400M card to terminate analog telephone lines (POTS).
The FXS-100 (FXS) module allows the A400M card to terminate analog telephones.
