Product Name: OpenVox D210P PCI ISDN PRI Card
Manufacturer: OpenVox
Model Number: D210P

OpenVox D210P PCI ISDN PRI Card

Please Note: This is a PCI Card. Please make sure your motherboard/server is compatible with this product.

The D210P is the latest hardware addition to the Openvox array of digital cards. The D210P supports E1, T1 and J1 environments and is selectable on a per-card or per-port basis. This feature enables signaling translation between E1 and T1 equipment and allows inexpensive T1 channel banks to connect with E1 circuits.
With the improved I/O speed, the card reduces CPU usage and increased card density per server. D210P is fully compatible with Asterisk™ application. Also, the open source driver supports an API interface for custom application development.
The D210P support industry standard telephony and data protocols, including Primary Rate ISDN (both N. American and Standard Euro) protocol families for voice, PPP, Cisco, HDLC, and Frame Relay data modes. Both line-side and trunk-side interfaces are supported, also included are advanced call features.
Other Features includes:

• Support for both 3.3v and 5v PCI slots.
• High Performance PCI Bus Master with up to 2Kbytes FIFO
• Easy to install: Use wct4xxp driver included in original Zaptel without any patch.
• RoHS compliant
• Certificates: CE and FCC
• Five year warranty
