Product Name: OpenVox FXO-100 Module
Manufacturer: OpenVox
Model Number: FXO-OPENV

OpenVox FXO-100 Module
The OpenVox FXO-100 module allows the A400P, A800P, and A1200P cards to terminate analog telephone lines (POTS). Thanks to the modular design, users can integrate additional ports at any time by adding more FXO-100 or FXS-100 daughter cards to the A400P, A800P, and A1200P. The FXO-100 module passes all the call features that any standard analog telephone line will support.
Key Features:

• Easy to upgrade: Simply attach additional FXO-100 modules to card to upgrade the system.
• Compatibility: FXO-100 is Pin to Pin compatible with Digium's X100M daughter card. User can use this module with TDM400P and TDM800P cards as well as OpenVox A400P, A800P, and A1200P.
• RoHS compliant
• Certificates: CE and FCC
• Five year warranty
