Product Name: OpenVox FXS-100 Module
Manufacturer: OpenVox
Model Number: FXS-OPENV

OpenVox FXS-100 Module
An OpenVox FXS-100 module allows the A400P, A800P, and A1200P cards to terminate analog telephones.  Thanks to the modular design, users can integrate additional ports at any time by adding more FXO-100 or FXS-100 daughter cards to the A400P, A800P, and A1200P. The FXS-100 module passes all the call features that any standard analog telephone will support.
