Manufacturer: OpenVox

Model Number: FD40

Openvox FD40 4 port IPPBX Failover Box - T1/E1/J1

The Failover Box includes Openvox FD40 4 port IPPBX Failover Box, and supports T1/E1 PRI interfaces. All of the products support asterisk PBX system. The Openvox FD40 is a 4 port IPPBX Failover Box - T1/E1/J1. The release of OpenVox FB40/FD40 failover box for BRI/PRI answers it. The FB40/FD40 can automatically switch the BRI/PRI line to the redundant server when the power of the main PBX server has been cut off and will automatically switch back to normal when the power is on again. In this way, no more worries about getting the BRI/PRI line connected to the redundant server when the main server is down. The Failover Box fully supports asterisk from version 1.2 to 1.6. Its main features include:

- Easy installation; uses USB to connect computer or server.
- Industry standard USB type B connector.
- USB 2.0 and 1.1 compliant.
- Low power consumption, takes power from USB bus.
- Standard length type A to type B cable provided.
- Supports software watchdog.
- Supports up to 4 Analog/ISDN BRI/PRI interfaces.
- Supports multiple FA40/FB40/FD40 devices in one system.
- Small plastic enclosure: 285mm x 110mm x 34mm.
- 4 power supply indicator lights.
- 5 year warranty.
