

Panasonic KX-TGP600 DECT Phone System

Product Name: Panasonic KX-TGP600 DECT Phone System

Manufacturer: Panasonic

Model Number: KX-TGP600

Panasonic KX-TGP600 DECT Phone System

The Panasonic KX-TGP600 DECT Phone System offers a great value single cell DECT solution that is remarkably easy to set up and manage. Its automated provisioning function enables easy deployment plus remote configuration of settings and handset management.

Panasonic KX-TGP600 Key Features

- Support for up to 8 DECT handsets / up to 8 SIP registrations
- Up to 8 simultaneous network conversations
- Allows up to 6 repeater
- Easy setup and maintenance
- Wall mountable
- Broadsoft/BroadWorks Certified
- Includes a KX-TPA60 handset:
- 1.8" colour LCD screen
- HD wideband audio (G.722)
- 500 phone book address/20 last dialled number memory

The KX-TGP600 consists of a DECT base station and a single KX-TPA60 handset which offers a 1.8" colour LCD backlight display, plus HD wideband audio (G.722) and a 500 capacity phone book. The TGP600 enables users to connect up to 8 DECT handsets and allows up to 8 simultaneous calls. In addition the TGP600 also offers users the option to use the new KX-TPA65 DECT desk phone as an alternative to the cordless TPA60 handset. The TPA65 is ideal for business users who want the convenience of a desk phone for normal telephone use but without the complications of connecting it to a phone line or network.

Advantages

- An easy-to-manage solution - The KX-TGP600 is remarkably easy to set up and manage. Its provisioning function enables remote configuration settings and handset management. Users can choose from two maintenance methods – local management with a base unit, or service provider management.
- A fully expandable solution - Users can connect as many as eight DECT wireless handsets or desk phones to the system. With the ability to use eight outside lines simultaneously, customer service becomes more efficient, and the cost and effort of installing and managing separate outside lines are removed completely. Similarly, the system allows users to have up to eight distinct phone numbers.
- A high-quality solution - A noise-reduction function reduces surrounding noise and enhances the clarity of the call at the press of a button. The KX-TGP600 also automatically adjusts the receiver volume to an easy-to-hear level if the user moves from a quiet area to somewhere noisier.
- A cost-saving solution - The combination of quality, reliability, ease and flexibility add up to a significant reduction in the overall cost of ownership of the KX-TGP600. Add this to a low initial cost and you have a system that offers far greater return on the user's investment over the lifetime of the technology.

There are a wide variety of handsets which are compatible with the KX-TGP600. Among those is the KX-TPA60 DECT wireless handset, offering a 1.8" colour LCD with backlight, HD wideband audio (G.722) and 500 phone book address/20 last dialled number memory. There's also the KX-TPA65 wireless desk phone, which offers a significant advantage over 'traditional' desk phones, as its DECT capabilities mean no additional cabling is required when the system is being installed.

Retail

Panasonic KX-TGP600 DECT Phone System

As most employees in a retail environment work away from the central office, wireless handsets are a perfect tool, with the base station placed on the manager's desk. As different members of staff deal with customers at the same time, overlapping ring assignments mean calls are answered without delay. Separate numbers can be assigned to different departments, to ring on specific handsets.

Warehouse

Wireless handsets, connected to a wireless desktop phone in the central office, ensure constant communication. With the KX-TGP600, there's no need for complex wiring over large areas such as warehouses. DECT coverage can be extended to outdoor areas, such as loading bays – and the KX-A406 repeater can extend this even further.

Small offices

The KX-TGP600 provides one system to serve the entire needs of small offices and home workers. Separate numbers and ring tones can be allocated to different functions – including a 'sales only' line. Incoming calls can be routed by DDI to specific handsets.

Restaurants

Mobility is important in a restaurant – wireless handsets and a central base station make this possible. Separate numbers and ring tones can be allocated to different handsets for different departments.

Panasonic KX-TGP600 - Technical Specifications

General

- BATTERY LIFE: Stand-by 200 hours, Talk-time 11 hours
- BATTERY CHARGE TIME 6 hours
- PS PHONEBOOK 500 numbers
- SPEAKER PHONE Full Duplex
