

Polycom Productivity Suite for SoundPoint IP Phones

Product Name: Polycom Productivity Suite for SoundPoint IP Phones

Manufacturer: Polycom

Model Number: 5150-47232-001

Visual Conference Management Intuitive, visual control and management of a four-party conference call right from the phone's display

- The industry's first stand-alone visual / audio conferencing management application on a SIP-based IP phone
- Eliminates need for a conference bridge for small ad-hoc conference calls
- Visually setup and manage local, ad-hoc conference of up to four parties effortlessly
- Mitigate the complexity of using complicated * codes to manage conferencing features

Corporate Directory Access Connecting business colleagues and partners faster!

- Eliminate duplication of directories
- Save time and resources by managing contacts in one directory
- Reduce time in finding and dialing contacts

Local Call Recording Instant recording of a live call to a standard external USB drive on the SoundPoint IP 650

- The industry's first local call recording application on a SIP-based IP phone
- Requires no special equipment or proprietary, server-based call recording system
- Enable the immediate recording of a call with an easy-to-use, visual interface
- Record all the calls in the highest audio quality for the ultimate playback experience
- Ideal for legal and regulatory record keeping, archiving, playback, and publishing

Voice Quality Monitoring Proactive monitoring and troubleshooting of voice quality issues for faster problem resolution

- The industry's first voice quality monitoring application that collects and transmits voice quality metrics directly from the phone in real time
- Replace many costly and complex solutions that require the use of network probes
- Improve IT productivity by enabling real-time troubleshooting and problem resolution

Third Party Call Control Remotely control the phone and share presence information using a third party application

- Ideal for integrating the SoundPoint IP phone with unified communications systems and applications
