Polycom Soundpoint IP 501 - 3-line desktop IP Phone Delivering Exceptional Sound Quality "The power of a network. The simplicity of a phone" Whether deploying MGCP or SIP standards, Polycom offers a solution that fits all of your business communication needs. The SoundPoint IP 501 is a VoIP telephone that seamlessly integrates with IP PBX and Softswitch vendors' IP solutions. With an intuitive user interface, the IP 501 offers dedicated, one-button access to common telephony features, whilst an information-rich display delivers content for messaging, directory access, call information and applications. The SoundPoint IP 501 provides superb voice quality when used in handset, headset or speakerphone mode. In addition, as protocols develop and standards evolve, it's easy to update the phones in the field via a software download, enabling new features and functionality as they become available.
