Polycom Soundstation IP4000 - The Clear SIP Conferencing Solution Remarkable Voice Quality For Your SIP Environment

With improved audio quality over the original Polycom SoundStation IP 3000 conference phone, the SoundStation IP 4000 is the answer for organisations that are ready for the benefits and versatility of a SIP voice conferencing unit.

Designed for offices or small to medium sized conference rooms, the SoundStation IP 4000 SIP unit provides remarkable room coverage. Users can speak naturally from up to 10-feet away from a microphone and still be heard clearly at the other end of the call. Optional extension microphones offer an increased pickup for larger rooms. Furthermore, with gated microphone technology, echo and background noise is almost entirely eliminated.

The SoundStation IP 4000 SIP also delivers familiar features that are easy to use. The menu driven user interface, viewable on a high-res backlit LCD, offers convenient access to the most-used business telephony functions including transfer, hold, redial, and conference.

For your next conference call, choose to enjoy great voice quality and the convenience of connecting directly into your SIP-based PBX with the Polycom SoundStation IP 4000 SIP.

Coupled with Polycom's desktop SoundPoint IP SIP telephones, the SoundStation IP 4000 SIP is the natural addition to your IP conference room or office.

With the greatest breadth and depth of integrated video, voice, and Web solutions, Polycom delivers the ultimate communications experience. Polycom's market-leading conferencing and collaboration technologies, supported by world-class service, enable people and organisations to maximize their effectiveness and productivity. With the most experience and proven best-practices in the industry, it's clear why Polycom is the smart choice for organisations seeking a strategic advantage in a real-time world.
