

Siemens Gigaset A580IP DECT Phone

Product Name: Siemens Gigaset A580IP DECT Phone

Manufacturer: Gigaset

Model Number: A580IP-N

Please note that the Siemens A580IP has been discontinued. We recommend the Siemens Gigaset N300IP Base Station and the Siemens Gigaset A58H Handset as a good alternative. The Siemens A580 DECT IP Phone is the latest addition to the Gigaset range of cordless dual mode phones. As with the S685IP and C475IP, the new A580 base station can be connected to both a standard landline and Broadband for IP/Internet Calls. Up to 6 handsets can be registered to the base station and it allows two internet calls as well as a landline call to be made at the same time.

This stylish handset maintains the ease of use and quality of the existing range with the addition of an SMS functionality PSTN/VoIP up to 160 characters for easy text messaging. The A580IP handset has an illuminated B/W display 96x64 pixel and features 5 polyphonic ring tones and 10 melodies. Being able to register the A580IP with 6 different SIP accounts gives the users the advantage of having 6 separate numbers or extensions at the same time, maximizing the use of their Internet connection for voice calls. Highlights

- Hands-free talking in brilliant sound quality with HSP
- SMS with up to 160 characters

Features

- Connects to a standard land line and Broadband for Internet calls.
