

Siemens Gigaset C475IP DECT Phone

Product Name: Siemens Gigaset C475IP DECT Phone

Manufacturer: Gigaset

Model Number: C475IP-N

Please note that the Siemens Gigaset C475IP is Out of Stock. We recommend the Gigaset N300 AIP Base Station and the Gigaset 59H Handset as a good alternative.

The attractive VoIP and fixed-line phone for up to 3 parallel calls, plus an integrated answering machine. The Voice over IP revolution is underway – and you can take advantage of cost-efficient internet telephony with the attractive Gigaset C475 IP cordless phone. Featuring an integrated answering machine, this smart hybrid phone is the ultimate in modern communication. It lets you easily switch between internet and fixed-line calls with a single press of a button on the phone’s handset – without a PC.

You can also expand your phone system with extra handsets so up to three family members and friends can telephone at the same time. If you’ve missed any calls while out and about, the Gigaset C475 IP offers a handy message notification feature that will send you an SMS²; and alert you about new messages on the machine. This Voice over IP model also features Gigaset’s energy-saving ECO DECT technology, which uses up to 60% less energy than our conventional cordless phones – so you can save money and be friendlier to the environment.

If you’re looking for an attractive hybrid phone with an integrated answering machine and an array of advanced messaging options, then look no further than the Gigaset C475 IP.

An answering machine for important messages You’re always in reach with the Gigaset C475 IP. This model’s integrated answering machine provides upto 30 minutes of recording time and will display a list of your new messages on the handset’s illuminated display. You can also access your messages from anywhere in the world thanks to the remote operation function. For extra convenience, the answering machine lets you individually select the recording time for messages and even gives you the option to record phone calls.

Hybrid phone convenience The Gigaset C475 IP is a modern hybrid phone that lets you easily switch between internet and fixed-line phoning with a single press of a key on the phone’s handset – without a PC . You can also add upto 6 extra handsets to the phone system and experience the flexibility of multiline calling. So your family members or friends can make up to 2 internet calls and 1 fixed-line call at the same time.

Advanced messaging for busy lifestyles Stay in touch with family and friends no matter where you are in the world – the Gigaset C475 IP offers you an array of options. The handy e-mail message notification function sends an alert to the handset with the time, date and subject of any new e-mails you receive. You don’t even have to be online. When you’re away from home, let this Voice over IP phone conveniently inform you of any missed calls by sending you an SMS – or send your own SMS from the phone’s handset if you’d love to chat, but just don’t have time.

A phonebook for all your contacts Store your list of contacts in one convenient place and always have it at hand. The Gigaset C475 IP features an extra-large phonebook that lets you manage the numbers of up to 150 of your family members and friends. Finding, editing or deleting your contacts is also simple thanks to the handset’s easy-to-read illuminated display and intuitive icon-based menu.

Talk handsfree in brilliant sound quality Thanks to this phone’s handsfree function, you can enjoy more comfortable telephone conversations. Simply carry on with the day’s tasks

Siemens Gigaset C475IP DECT Phone

or just lie back on the couch and relax with your hands behind your head – and still be able to chat with friends or family in brilliant sound quality.

Your world's at your fingertips with Gigaset.net. There's no quicker way to start phoning with your loved ones over the internet than with Gigaset.net. Purchase the Gigaset C475 IP phone and you'll automatically become a member of this exclusive Gigaset IP network community. That means you'll be able to make Voice over IP calls to anyone else with a Gigaset IP phone – anywhere and anytime for free – and you won't even need an account with a VoIP provider. What's more, you'll be able to access free subscription services such as RSS feeds and weather information directly via your Gigaset handset.

ECO DECT** for saving energy and costs. Thanks to the energy-saving power supply, the Gigaset C475 IP uses up to 60% less energy than our conventional cordless phones – making it easier on the environment and more cost effective. Like all Gigaset cordless phones, it also variably reduces transmitting power from the handset to base station according to their distance apart – but goes further in a number of other ways. Choosing ECO Mode on this model reduces the base station's transmission power by 80% ³. As a result, you can enjoy a more energy-efficient way of staying connected with the world.

Specially designed for keeping in touch with friends and family around the globe, the attractive Gigaset C475 IP offers you all the convenience of cordless Voice over IP communication, plus an integrated answering machine.
