

Snom M325 M300 Base Station and M25 DECT Handset

Product Name: Snom M325 M300 Base Station and M25 DECT Handset

Manufacturer: Snom

Model Number: M325

Snom M325 M300 Base Station and M25 DECT Handset

The Snom M325 M300 Base Station and M25 DECT Handset Comprises the M300 base station and one M25 handset. This single cell DECT package forms the basis of a uniquely powerful and expansive mobile telephony solution. Running up to 20 handsets on the base station, this solution means that there will be enough phones for everyone in a small office environment. With a range of up to 300 meters outdoors and approximately 50 meters indoors, the base station provides broad coverage, which can be extended by adding up to three snom M5 repeaters to ensure there are no blind spots in a deployment. snom's single cell DECT solution is easy to install and provision and utilizes the same interface as snom desk phones for a comfortable and familiar user experience. The solution is interoperable with the full spectrum of major IP-PBX systems. No extra licenses are required for additional codecs, features, audio channels, etc. resulting in no unexpected additional costs or surprises.

Snom M325 M300 M25 Key Features

- M300 base station and M25 handset package
- Up to 20 handsets
