

Snom M3 Dect VoIP Phone

Product Name: Snom M3 Dect VoIP Phone

Manufacturer: Snom

Model Number: SNOMM3

Snom M3 Cordless IP Phone

Please Note: The Snom M3 Cordless IP Phone has been discontinued. For an alternative, we recommended the Snom M9R DECT VoIP Phone .

The m3 is snom's first IP DECT phone product. The M3 provides the latest in style, function and mobility without any compromise in telephony audio quality.

The snom m3 is the perfect phone for demanding home office, small to medium business (SMB) and enterprise users. It is an expandable system with multiline functionality for up to eight handsets, handling up to three simultaneous calls at a time. The m3 has a 128 x 128 px colour display with backlight and has operating times of 10 hours talk or 100 hours standby. There are many additional features including three-way conference calling, call transferring, hold music, call forwarding and speed dialing with an address book (up to 100 entries).

The m3 provides maximum freedom and ease-of-use. The snom phone has an indoor range of 50 metres with an outdoor range of 100 metres. The snom m3 menu is easily configurable to meet each individual user's needs – with the option to configure on-site or remotely. Innovative features are both inside and out on the m3. Snom worked with a renowned designer, known for his work in luxury car phone installations (such as Maybach, Porsche and BMW) to create the snom m3's sleek, modern and desirable look.
