VXI Passport 10V Headset QD1026 (Aastra, Polycom)

Professional grade headset solutions with easy interchangeability The Passport 10V QD1026 is a high quality, professional grade monaural headset solution for call-centre use. Passport V-DC headsets work with all VXI standard amplifiers but are specifically designed for direct connect cords. Passport headsets use the same impact-resistant plastic used in sports equipment to withstand the intensity of the 24 hour call-centre. Durable construction means fewer repairs and less hassle. VXI QD1026 Features

- Noise cancelling microphone greatly reduces background noise for a more professional sounding call
- Durable components for long product life
- Adjustable ratchet headband for secure, comfortable fit
- Left or right side microphone placement
- Flexible microphone boom easily adjusts and stays in position for consistent voice input

The Passport 10v-DC is compatible with the GXP 2000, the Aastra 9112i, 9133i, 480i and SNOM 320, 360.
