Professional grade headset solutions with easy interchangeability

The Passport 10V-DC is a high quality, professional grade monaural headset solution for call-centre use. Passport V-DC headsets work with all VXI standard amplifiers but are specifically designed for direct connect cords. Passport headsets use the same impact-resistant plastic used in sports equipment to withstand the intensity of the 24 hour call-centre. Durable construction means fewer repairs and less hassle. QD1026 Features

- Noise cancelling microphone greatly reduces background noise for a more professional sounding call
- Durable components for long product life
- Adjustable ratchet headband for secure, comfortable fit
- Left or right side microphone placement
- Flexible microphone boom easily adjusts and stays in position for consistent voice input
