VXI Passport 10V Headset QD1027 (RJ9 with red on cord)

The VXI Passport 10V Headset QD1027 is a feature rich, high quality professional grade monaural headset solution for call-centre use. The VXI Passport 10V Headset QD1027 is compatible with a number of VoIP Phones including the Yealink and Grandstream brands. Compatible with all of the following IP phones:

- Yealink (all with RJ9 headset port)
- Snom 320/ 360/ 370/ 821/ 870/ 720/ 760
- Grandstream GXP2120, GXP2110, GXP2100, GXP2020, GXP2010, GXP14XX, GXP1200, GXP28X, GXV3175

Features of the VXI Passport 10V Headset QD1027

- Noise cancelling microphone greatly reduces background noise for a more professional sounding call
- Durable components for long product life
- Adjustable ratchet headband for secure, comfortable fit
- Left or right side microphone placement
- Flexible microphone boom easily adjusts and stays in position for consistent voice input

The VXI Passport 10V Headset QD1027 works with all VXI standard amplifiers but are specifically designed for direct connect cords. Passport headsets use the same impact-resistant plastic used in sports equipment to withstand the intensity of the 24 hour call-centre. Durable construction means fewer repairs and less hassle. If you require more information on the compatibility of IP Headsets to VoIP Headsets, please see our comprehensive compatibility VoIP Headset Guide.

For further information on the compatibility of IP headsets to VoIP Phones please see our VoIP Headset compatibility guide

The VXI Passport 10V Headset QD1027 is compatible with the GXP 2000, the Aastra 9112i, 9133i, 480i and SNOM 320, 360.
