VXI Passport 20V-DC Binaural Headset

Product Name: VXI Passport 20V-DC Binaural Headset

Manufacturer: VXI Corporation

Model Number: VXI20V

Please Note: The VXI Passport 20V-DC Binaural Headset has been discontinued. For an alternative, we recommended the VXI Passport 21v-DC range .

Call center managers know that a quality headset means a happier, more productive agent and fewer problems overall. The ultra-comfortable fit means all-day-wear is stress free and the noise canceling microphone blocks out the sound of surrounding agents for a more professional sounding call. Made with the same impact resistant plastic used in sports equipment to withstand the turbulence of 24/7 operations, Passport headsets are made to handle the intense requirements of the professional contact center.

The Passport 10V-DC and Passport 20V-DC models will connect to the QD1026, QD1027, QD1029, QD1095, QD1085, QD1028 Y cord, and QD1000 model cords already offered on this website. Compatibility with these headsets and cords is the same as with the Tuffset headsets.

VXI Passport 20V-DC Features & Benefits

- Compatible with VXI Passport V-series amplifiers and direct connect cords.
- Noise-canceling microphone greatly reduces background noise for a professional sounding call
- Durable construction to endure the stress of the 24/7 call center
- Virtually indestructible, highly flexible gooseneck boom. Rotates for left or right ear placement. Maintains position for consistent voice quality
- Sturdy quick disconnect allows fast and easy detachment from lower cord for greater mobility
- Adjustable headband secures positional adjustment, won't slide out of position
- Concave ear cushion for greater comfort and improved sound

Price: £61.00
