

VXI ProSet Lux10 Headset (Monaural)

Product Name: VXI ProSet Lux10 Headset (Monaural)

Manufacturer: VXI Corporation

Model Number: 203315

VXi UC ProSet LUX10 Headset (Monaural)

If you work in a Unified Communications environment, you're well aware of its value. You see the efficiencies it brings. You probably also know that the headset you're using just isn't cutting it. That's why VXI created the UC ProSet LUX headset. When used with Unified Communication applications, UC ProSet LUX's patent pending LED presence indication notifies others of your availability visually by an illuminated status indicator at the end of the microphone. The UC ProSet LUX gives you all the "in a class by itself"• benefits of our UC ProSet, like advanced noise-canceling, durability and reliability. Then adds an integrated USB interface (with inline audio control), state-of-the-art DSP (digital signal processing) technology and hi-fi stereo audio quality. The UC ProSet LUX is plug-and-play, designed to interface with popular PC-based UC systems and USB-equipped softphones. It's lightweight and comfortable enough to wear hour after hour, and delivers true hi-fi stereo sound so voices sound clear and natural, and audio from any media sounds incredible. Put it all together, and you get the best UC headset money can buy at a price that will surprise you.

VXi UC ProSet LUX Key Features

- Hi-Fi audio for superior sound quality from any source.
- USB interface for plug-and-play ease of use.
- Inline control of volume, mute, on/off hook.
