

Xorcom Blue Steel CXT3000 Heavy Duty IP PBX

Product Name: Xorcom Blue Steel CXT3000 Heavy Duty IP PBX

Manufacturer: Xorcom

Model Number: CXT3000

Xorcom Blue Steel XT3000 Heavy Duty IP PBX

The Xorcom Blue Steel XT3000 IP PBX is built on the foundations of the Xorcom CXE4000 series, and adds a number of brand new features in a small form-factor case.

Xorcom Blue Steel XT3000 Key Features

- Two Hot-Swappable 24 x 7 server-grade hard drives
- Two Hot-Swappable 250W power supplies
- Powers up to four fully-populated Astribanks with full redundancy
- Server-grade fans and a smart temperature control system

The Blue Steel series is a heavy-duty, robust and well designed system which features two hard drives, two power supplies and can support up to four Astribanks with full redundancy. The hard drives are easily accessible from the front panel, or can be locked with a special key for limited access. If one hard drive should fail, it is easily replaced, and the data will automatically be synchronised with the existing drive.

If one of the high-reliability power supplies fails, it will not affect system performance, but will generate an error message straight to the designated system administrator.
