

Xorcom CompleteSBC Session Border Controller Licence

Product Name: Xorcom CompleteSBC Session Border Controller Licence

Manufacturer: Xorcom

Model Number: LC0054

Xorcom CompleteSBC Session Border Controller Licence

Please Note: The Xorcom CompleteSBC Session Border Controller Licence price is per Licence. The Xorcom Complete SBC Session Border Controller is a Session Border Controller (SBC) that provides intrusion prevention for the IP-PBX, acting as a "SIP firewall" for access control and Denial of Service (DoS), NAT traversal, smart routing, and messages repair to solve interoperability problems.

Xorcom CompleteSBC Key Features

- Access control and fraud prevention
- Denial of Service (DoS) and overload protection
- NAT traversal
- Smart routing
- Interoperability mediation
- B2BUA server to support additional applications, e.g.: SIP UDP/TCP/TLS gateway
- Powerful GUI interface for easy configuration of many complex features
- Xorcom IP-PBX: Reliable, Flexible Asterisk-based Telephony Platforms

The CompleteSBC complements all members of Xorcom's Complete PBX all-in-one appliances, which allow seamless communication using both VoIP and traditional telephony protocols. CompletePBX — featuring easy endpoint integration, support for remote extensions, a built-in basic call center, and more — allows businesses to streamline their office communications. Xorcom's unique system design ensures the reliability expected from a propriety telephony system, while providing the flexibility, scalability, easy integration and competitive pricing afforded by an open source platform. The Xorcom IP-PBX line supports all the features of the extremely popular Asterisk PBX operating system while providing additional benefits, such as dual-PBX hot failover with the award-winning TwinStar feature, high density of telephony interface combinations in a small footprint, etc.
