Xorcom Orion VX2000 Video Conferencing Solution

The Xorcom Orion VX2000 Video Conferencing Solution is a stand-alone, high-definition video (and voice) conferencing bridge. It is easy-to-deploy, use and manage, and supports up to eight concurrent conferences, up to 16 HD participants, up to 29 total participants per conference, desktop/content sharing and any SIP, H.323 or H.239 end point or soft client.

Xorcom Orion VX2000 Key Features

- Up to 29 Participants per Conference (up to 16 viewable HD participants)
- Up to 8 Simultaneous Conferences per MCU
- Desktop Sharing
- Aggressively Priced, Yet All-Inclusive (No Hidden Costs)
- Hosted, Managed, or On-Premise
- Any SIP/H.323/H.239 End Point or Soft Client

The Orion VX2000 is capable of identifying the end point resolution capabilities, and providing each user with the optimal video stream for their device, thus bridging the gaps and allowing connectivity between a wide variety of devices including desktops, tablets, smartphones, video phones and room systems. Furthermore, Orion VX2000 offers a complete set of features and capabilities required by Service Providers offering a variety of video conferencing services: on premise, managed, or hosted in the cloud.
