

# Xorcom Rapid Recovery (XR0068)

Product Name: Xorcom Rapid Recovery (XR0068)

Manufacturer: Xorcom

Model Number: XR0068

Availability: In Stock

Rapid Recovery - Backup UtilityNew 'Disk on Key'-based PBX Recovery Accessory

P/N = XR0068

As part of Xorcom's drive to enhance and improve communications in a variety of business settings, we have developed a product called Xorcom Rapid Recovery™ (XRR).

Xorcom Rapid Recovery is a credit-card-size Disk-on-Key device for recovering your IP-PBX.

It is a unique software package installed on a credit-card-size (or smaller form factor) Disk-on-Key (DOK) that enables simple, safe and speedy recovery of Xorcom's XR1000, XR2000 and XR3000 IP-PBX solutions. For information about purchasing this technology for non-Xorcom Asterisk-based IP-PBX systems, contact us.

In just a few minutes, the XRR can restore and recover the Xorcom IP-PBX, including its configuration files, voice prompts and even voice mail, if desired.

Since it is possible to give each backup a descriptive name, many different IP-PBX system backups may be stored on the same DOK. The XRR compresses typical Asterisk configurations, including the complete trixbox CE™ or Elastix™ Asterisk distributions, to less than 0.5 GB. Consequently, a standard 2 GB DOK will typically store up to 4 different system recoveries.

## New Tiny Form Factor

A new form factor, measuring a mere 3.45 x 1.53 cm (1.5" x 0.6"), is ideal for use with Xorcom's most compact IP-PBX, the XR1000.
