

Xorcom Telecom Connector Option (XR0034)

Product Name: Xorcom Telecom Connector Option (XR0034)

Manufacturer: Xorcom

Model Number: XR0034/2U

Availability: In Stock

Telecom Connector Option (TCO)

This option (P/N XR0034) is available as an optional factory installed add-on for Xorcom XR2000, XR3000 or Astribank chassis with eight or more FXS ports.

Astribank unit with Telco Connector Option (rear panel)

To streamline installation of multi-port systems, the TCO unites all FXS ports on the Xorcom unit into a single telecom connector on the rear panel. A special telecom cable with 32 color-coded twisted pairs (supplied as part of the option) routes the 32 ports to the building telephony wiring. The Telco port is connected in parallel to the front panel FXS ports, and does not disable it — so the front panel RJ11 connectors can be used in parallel with the Telco port for maintenance or other purposes. In addition, the indication lights are active when the Telco port is in use.

TCO cable with 32 color-coded twisted pairs

Overview of Xorcom Network Topology

Xorcom Astribanks USB Based Telephony Modules for Asterisk

Xorcom IP PBX Product Lines & PBX Servers

Supported Extras Options

TwinStar Hot Failover
