

Xorcom XR0126 2 FXS 6 FXO Telephony Interface

Product Name: Xorcom XR0126 2 FXS 6 FXO Telephony Interface

Manufacturer: Xorcom

Model Number: XR0126

Xorcom XR0126 Two FXS Ports and Six FXO Ports; Suitable for All Chassis

Xorcom are introducing another telephony interface board to our product family, P/N XR0126. It will contain two FXS ports and six FXO ports. Like its "older brother", the XR0035/XR0036, which has six FXS ports and two FXO ports, it will be connected to the mainboard using two cables and identify itself to the Asterisk server as two modules. The price and assembly policy are identical to those of the existing combination board; it can be used in the Astribank and all IP-PBX models (factory installed only), with no other modules present.

Not sure what size Telephone System you need? Use our Product Configurator

Price: £147.34
