

# Y-cam MultiLive for Windows

Product Name: Y-cam MultiLive for Windows

Manufacturer: -

Model Number: MULTILIVE

## Y-cam MultiLive for Windows

MultiLive v1.6 is our free NVR software &ndash; providing a centralised method for monitoring and recording footage from your Y-cam IP cameras, allowing you to easily record footage, view multiple cameras at multiple locations, and view cameras full screen. Please [Click here to download Y-cam MultiLive for Windows](#)

Supports up to 36 cameras View one camera full screen, or in split screen layouts of 4, 9, 16, 25 and 36 windows.

Quick and simple access Gives easy access to your cameras &ndash; storing IP address and port numbers as well as username and passwords for instant viewing.

Easily disable/enable alarms Disable alarms for single or multiple cameras with one click without needing to go in to separate camera settings.

Instantly record to your local hard drive or NAS One click record lets you preserve individual or all camera footage for immediate response to real-time incidents, or set up alarms to record direct to your hard drive.

Take snapshots Take simple snapshots of the camera scene at the click of a button.

On-Screen Display Give each of your cameras unique names and see this overlayed in the corner of each feed, for a quick and easy reference guide.

Digital Zoom Increase your view with this basic and easy to use zoom function.

Multi-Lingual MultiLive is now available in six languages &ndash; English, French, German, Italian, Spanish and Dutch.

Improved Interface & Graphics We've revamped the old version of MultiLive and given it a makeover, with new desktop icon and interface.

Free of charge Y-cam MultiLive is free NVR software, and is provided for free with all new Y-cam cameras, and complimentary updates are available through our website.
